Reset to factory values
1. Press the reset button for approximately 10 sec.:
   » *after 3 seconds you will hear a beep*
   » *after 10 seconds you will hear a second beep*
2. Release the reset button
   » *if the procedure was completed successfully, you will hear a confirmation tone; the red LED flashes and the button backlighting comes on for the duration of the device restart procedure.*
   » *if there is a device error you will hear an error tone.*

Connection distances

**If Art. UT8020 is powered directly from third-party standard POE switches, the maximum distance is reduced to 100 m.**
